**UAN:** 0483-0000-25-009-L01-P

## Wellstar MCG SERC Practice Session #1

**Omar Mouna, PGY2 Ambulatory Care Resident**

**Emily Strickland, PGY1 Resident**

**Hanh Tran, PGY2 Oncology Resident**

**Chloe McGee, PGY1 Resident**

**Alex Durant, PGY1 Resident**

**Target Audience:** This activity is intended for pharmacists

**Date:** April 15, 2025 **Time:** 1p-3p **Location:** Wellstar MCG Health and via MS Teams

**Learning Objectives:** At the conclusion of this activity, participants will be able to:

- (1) Determine the impact of initiating GLP-1 receptor agonists compared to GLP-1/GIP receptor agonists on total daily insulin requirements in adults with Type 2 Diabetes Mellitus after 6 months.
- (2) Determine if there is an improvement in clinical outcomes, including HbA1c, when patients are followed by the internal medicine clinical pharmacist and are enrolled in a medical student telehealth clinic.
- (3) Evaluate the study design, statistical analysis, and future direction of FONDO-LOW study
- (4) Evaluate the impact of successful HCV treatment with a pangenotypic DAA on renal function.
- (5) Describe the effects of maintenance corticosteroid dose reduction on blood pressure, hemoglobin A1c, and bone mineral density in pediatric renal transplant patients.
