This program is a **Knowledge**-Based CPE Activity

**UAN: 0483-0000-25-004-L01-P**

## **Optimizing Hemostasis: Andexanet Alfa & 4 Factor Prothrombin Complex Concentrate**

**Andrew Norton, PharmD**

PGY2 Emergency Medicine Pharmacy Resident  
Wellstar Kennestone

Target Audience: This activity is intended for pharmacists

Date: March 6, 2025 Time: 2p-3p Location: Wellstar MCG Health and via MS Teams

Learning Objectives: At the conclusion of this activity, participants will be able to:

1. State the mechanism of action and pathophysiology for both Andexanet alfa and 4 factor prothrombin complex concentrates (4F-PCCs) for direct oral anticoagulant (DOAC) reversal
2. Evaluate guideline recommendations and other published literature regarding the use of Andexanet alfa and 4F-PCCs for DOAC reversal
3. Analyze dosing strategies and drug properties of DOACs, Andexanet alfa, and 4F-PCCs
4. Apply evidence-based medicine and drug knowledge to the clinical application of DOAC reversal management

Visit <https://wellstar.learningexpressce.com/> to login or sign-up

Participants who attend the entire activity, complete and pass the post-test (>70%) and complete the activity evaluation will receive CE credit. Credit will be uploaded electronically and be available in CPE Monitor after completion of required elements.
