UAN: 0483-0000-25-002-L01-P

Heart-Lung Interactions in Emergency Situations

John Ethan Young, PharmD

PGY2 Critical Care Pharmacy Resident
Piedmont Columbus Regional Midtown

Target Audience: This activity is intended for pharmacists

Date: February 20, 2025 Time: 1p-2p Location: Wellstar MCG Health and via MS Teams

Learning Objectives: At the conclusion of this activity, participants will be able to:

- (1) Discuss the mechanics of breathing and the role of pressure changes during inspiration and expiration
- (2) Understand how positive pressure ventilation impacts cardiac function
- (3) Discuss clinical scenarios where heart-lung interactions exist and may drive the choice of treatment

Visit <https://wellstar.learningexpressce.com/> to login or sign-up

Participants who attend the entire activity, complete and pass the post-test (>70%) and complete the activity evaluation will receive CE credit. Credit will be uploaded electronically and be available in CPE Monitor after completion of required elements.
