UAN: 0483-0000-25-001-L01-P

Updates in the Management of the Shock Patient: Shocking News and Shock 'em Blue

Alexandria Howell, PharmD

PGY2 Critical Care Pharmacy Resident

Grady Memorial Hospital

Target Audience: This activity is intended for pharmacists

Date: February 6, 2025 **Time:** 2p-3p **Location:** Wellstar MCG Health and via MS Teams

Learning Objectives: At the conclusion of this activity, participants will be able to:

- (1) Review the data supporting resuscitation recommendation for 30 cc/kg in sepsis/septic shock
- (2) Analyze the evidence of the two major studies to evaluate liberal versus restrictive fluids in resuscitation and fluid management in septic shock
- (3) Recognize considerations when initiating vasopressors, including peripheral vs central routes
- (4) Discuss the management of refractory shock with adjunctive therapies

Visit <https://wellstar.learningexpressce.com/> to login or sign-up

Participants who attend the entire activity, complete and pass the post-test (>70%) and complete the activity evaluation will receive CE credit. Credit will be uploaded electronically and be available in CPE Monitor after completion of required elements.
