This program is an Application-Based CPE Activity

UAN: 0483-0000-24-008-L01-P

A Pharmacist's Guide to Obstetric Emergencies

Aubrey Murphy, PharmD

PGY2 Emergency Medicine Pharmacy Resident
Grady Memorial Hospital

Target Audience: This activity is intended for pharmacists

Date: May 2, 2024 **Time:** 2p-3p **Location:** via MS Teams and MCG Health (BP-4596)

Learning Objectives: At the conclusion of this activity, participants will be able to:

- Explain changes in basic pharmacokinetic and pharmacodynamic principles as they apply to the pregnant patient.
- List pharmacologic agents most commonly used for each corresponding obstetric emergency.
- Appraise the quality of evidence and applicability of guideline recommendations for managing obstetric patients.
- Compare risk and benefit profiles of proposed management strategies for cardiac arrest, sepsis, hypertensive disorders, and hemorrhage in pregnancy.
- Cite recent changes in federal legislation governing rights to abortion and describe their impact at the regional level.
