**UAN: 0483-0000-23-016-H01-T**

## Cold Feet? Rescue with Xarel-“toe” for Peripheral Artery Disease

**Kosha Patel, PharmD**

PGY1 Pharmacy Resident  
Wellstar Cobb Hospital

**Target Audience:** This activity is intended for pharmacists and pharmacy technicians

**Start date:** 6/29/2023      **Expiration date:** 6/29/2024      **Location:** Web-based

**Learning Objectives:** At the conclusion of this activity, participants will be able to:

### Pharmacists:

1. Describe the pathophysiology and diagnostic criteria of peripheral artery disease (PAD).
2. Discuss the risk factors, clinical presentation, and complications associated with PAD.
3. Differentiate between the stages of disease progression and identify current treatment recommendations for PAD.
4. Evaluate current literature supporting the use of rivaroxaban for the management of PAD.

### Technicians:

1. Describe the risk factors, clinical presentation, and complications associated with PAD.
2. Distinguish between the different treatment options available for PAD.
